

PRODUCT INTRODUCTION:

The firefighting suit is one of the important equipment of PPE. Most of the body part of the firefighter is protected by this suit.

Firefighter suits are a two pieces garment- jacket and trousers which consist of 3 layers - outer layer, moisture barrier, and thermal barrier. The jacket has a stand up collar, elasticated cuffs, closed by a zip covered by an overlapping front with touch and close fastening to the front and collar. The trousers have wide elasticated braces with adjusters and quick-release buckles.

The material of this firefighter protective suits is to protect the skin from the heat radiating from the fire and from burns and scalding by steam.

PRODUCT PERFORMANCE PARAMETERS:

Model: RSZD-F

Standard: EN 469:2005, SOLAS 74, FSS Code

Outer Fabric: Nomex 200 woven fabric, 93% meta-aramid / 5% para-aramid / 2% carbon fibre, 200g/m²
